*State of CT Action Levels for Issued June 2022 - May 2023 June of 2022. Results in bold are Action Level exceedances. PFBA testing was added in 2023 and had not been tested previously. These replace the earlier EPA health advisory levels of 70 parts per trillion for combined PFOA and PFOS, and the State of CT health advisory level of 70 parts per trillion for combined PFOA, PFOS, PFNA, PFHxS, and PFHpA.

** non-weighted average

*** Progress Drive was sampled on 10/18/23 but will need to be resampled to meet QC specs. Preliminary results were consistent with past results.

WHERE DOES MY WATER COME FROM?

The purple zone receives nearly all their water directly from the Globe Hollow Treatment Plant. The blue zone is a blended combination of water from the Charter Oak and Parker Street municipal wells and the Globe Hollow Treatment Plant. The orange zone is a blend of water from the Charter Oak Wells, Progress Drive, and the Globe Hollow Treatment Plant. The yellow zone is a blend of well water from the New State Road and Love Lane Wells.

Concentrations reported in the Water Quality Report are based on weighted flow averages. Values above represent the raw values from testing. The water you receive is blended from multiple water sources. While the colored columns correspond roughly to the map please refer to the above paragraph to factor in each source that contributes to your geographic zone.
